Thomas – My Sporting Journey Part 4

If you grow – your kit has to grow too!

I have trained very hard through the winter and being a teenager I'm also growing and getting much taller. We found that my medium sized RaceRunner was just too small for me. Unfortunately these wonderful pieces of equipment do not come cheap so we started fundraising for my new RaceRunner.

I had a couple of assessment's and with the brilliant advice from Quest 88 who supply the RaceRunners and kindly loaned me a large and then extra large RaceRunner, we were able to make the decision on what type of RaceRunner would be right for me.

We did a lot of fundraising including crowd funding and we were over the moon when we heard that the Douglas Bader Foundation wanted to support me again to help fund my new RaceRunner.

Thank you to everyone who supports and donates to the Douglas Bader Foundation as without them this would not have happened. I couldn't believe it when in we got the news that my new RaceRunner had arrived from Denmark and I was so excited to finally get it. It is shiny and a brilliant black colour and quite light weight.
